Прочитайте бегло текст, чтобы понять основную идею (о чём в целом идёт речь). Прочитайте внимательно каждое предложение и варианты ответа. Перефразируйте утверждение в вопрос, не обращая внимания на предложенные варианты ответа, и определите, в какой части текста находится ответ на вопрос. Выберите из предложенных вариантов ответа наиболее подходящий. Помните, что в тексте слова могут быть заменены на синонимичные.

Hearing, sight, taste, smell, and touch are human senses. We use them every day when we walk, study, eat, or drink. There are animal senses, too. Most animals use them to find food or survive. For example, some birds can see a mouse at a distance of more than 1 kilometre. Mice have very good hearing, and it saves them from such birds.

Insects' senses are often different from ours. Butterflies, for example, taste with their feet. Some animals feel the weather. For example, ants often look for food just before the weather gets bad.
